
Increase your confidence and profitability

TÜV Middle East – A Competent and International Partner for Second Party Audits

Companies involved in any business need to manage risks related to quality, environment, health, safety, food safety / hygiene, etc to demonstrate compliance, good corporate social responsibility and meet legal compliance if they want to be competitive, reputable and improve. Second Party Audits can be an improvement tool to achieve that competitive edge.

The basis of the audit will be the company requirements / expectations, applicable legal and regulatory requirements, best practices, etc... Through audits, the auditors verify the organization's compliance to the applicable requirements. The outcome of this audit will clearly state the strong points, non conformities and improvement potentials. By taking relevant actions to the areas of concern, the organization will increase the level of compliance. These audits can be extended to the suppliers also as they play a crucial role in the day to day activities of the organization.

Target groups

Second Party Audits are particularly aimed at all levels of an organization where supplier management is a critical matter for the performance of the organization, this can include food industry, construction industry, logistic industry, aviation industry, automobile industry ... etc. An independent audit is recommended for all supply companies and organizations to discover areas of improvement in supplying services and products.

Benefits

Clients gain from continuous optimization and better compliance of the supply chain and better market opportunities as a result of improved efficiency. In addition, delivery time in the supply chain can be reduced and the awareness of requirements is strengthened. The Second Party Audits offer continuous supervision of supply parties from a neutral body. This serves as a proof to shareholders, management and external parties that an efficient system for auditing is in place and is a serious corporate objective. This also ensures better legal compliance.

Prerequisites for certification

The organization must meet the following criteria in order to proceed with Second Party Audits:

- Nominate a audit representative
- Identify the needs & expectations against which audit to be done
- Communicate with auditees

Steps for the second party audits

The process for second party audits will have the following steps:

- Enquiry
- Identify the client requirements
- Develop audit criteria, methodology ... etc
- Client approval
- Audit planning
- Audit performance
- Audit reporting
- Audit follow up
