

TÜV UK Ltd. is member of TÜV NORD Group, one of the world's leading service companies in the areas of Technical Inspection and Certification. TÜV NORD's 10,000 employees are serving clients in more than 70 countries worldwide. TÜV UK Ltd. operates mainly in the UK and Ireland. As our Certification business is growing, we are seeking qualified freelance ISO 27001 Lead Auditors with a strong background information security. The role is field based and a central UK location would be ideal.

Essential experience and Qualifications:

- Existing third party ISO 27001 auditing experience with a UKAS (or equivalent) accredited Certification Body (CB).
- At least 4 year's demonstrable work experience in the field of Information Technology, with at least 2 year's work experience in Information Security.
- A further for higher education qualification in a discipline related to Information Security or Information Technology.

Responsibilities:

- Auditing clients according to ISO 9001 and ISO 27001 standards.
- Preparing audit reports and conducting technical reviews for supporting certification decisions.
- The prime responsibility is to have a pro-active approach to our customers certification related questions. The ability to determine and/or advise on appropriate solutions within the framework of recognised Standards or specifications is essential.

Skills:

- Evidence to demonstrate they can undertake the stated responsibilities.
- Be a self-motivated individual with a customer and solution oriented personality and have unquestionable and precise work ethics.
- Customer and solution oriented.
- Personality with precise work ethics.
- Excellent communication skills in written and oral form, ability to converse – at all levels on certification matters.
- Be proficient in all Microsoft office packages.

Eligible to work in the UK, a clean driving licence and the facility to work from home.

We are looking forward to your application.
