

TÜV UK Ltd – Certification of Quality

Management Systems according to ISO 9001

In today's world, adherence to clearly defined quality standards is important, especially in international business. Amongst other aspects, this includes ongoing learning and continual improvement processes, service and the ability to adapt to constantly evolving markets and customer requirements.

These complex demands can be met by a process-oriented QM. This standard already forms the basis for quality assurance and quality management for many organisations in a wide range of different sectors.

A functioning management system enables individual company structures to be precisely tailored to meet the specific needs and specifications of the customer. Operating procedures can subsequently be flexibly designed in a manner that enables everyone to benefit.

Target groups for certification

A QM system according to ISO 9001 forms an ideal basis for modern organisations of all sizes both on the national and international level to demonstrate their expertise and efficiency. Internal work processes, responsibilities and competencies are taken into consideration, as is the regulation of processes when working with customers and business partners. ISO 9001 enjoys worldwide comparability, as well as compatibility with other management systems.

Benefits of certification

- Sustainable quality assurance.
- Identification of potential for improvement and savings.
- High level of customer and employee satisfaction.
- Image enhancement.
- Risk minimisation.
- Better cost-effectiveness through process improvement.
- Enhanced competitiveness.
- Fulfilment of specific customer requirements.

Globally adopted in virtually all industries, ISO 9001 has become the most recognised Management System Standard

ISO 9001, the world's most popular standard for quality management, is now under review, with an updated version due to be available by the end of 2015.

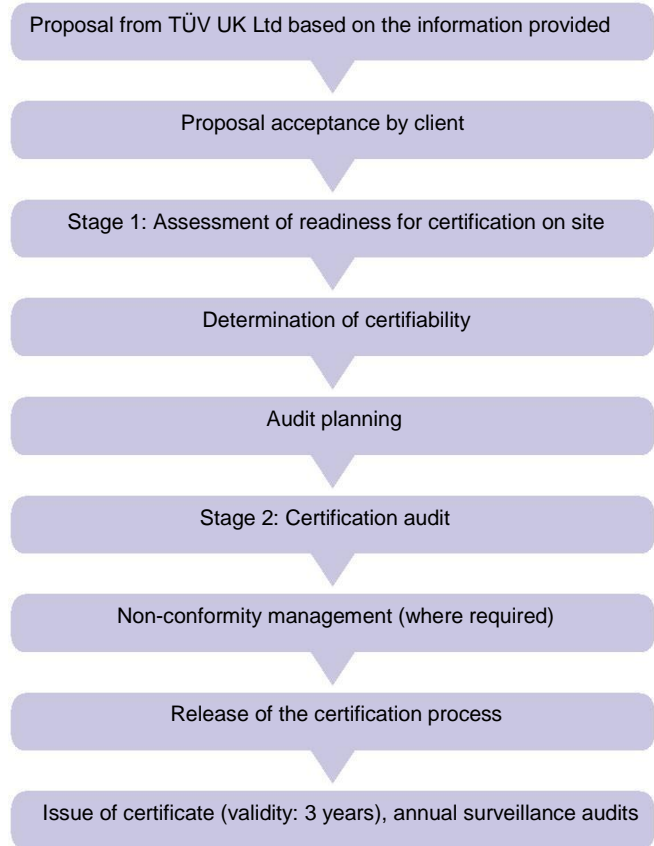

Certification content

- Continuous improvement.
- Non-conformity prevention.
- Reduction of variation and waste in the supply chain.
- Identification and monitoring of quality-related costs.
- Product liability and product safety.
- Determination of employee and customer satisfaction.
- Separate consideration of product and process development.
- Interdisciplinary co-operation.

Our know-how for your success

TÜV UK Ltd is a well-established and reliable partner for inspection and certification services. Our experts and auditors have extensive knowledge based on experience. This guarantees independence and neutrality, and also means we can offer continuity in supporting our clients. The benefit to you is clear: our auditors accompany and support the development of your company and provide you with objective feedback.

Process of Certification

Are you interested?
Please send us your response by fax,
email or post.
We look forward to hearing from you.

Yes, I am interested in certification of Quality Management Systems according to ISO 9001. Please contact me.
