Making our world safe

We are an accredited certification body for ISO 14001

What is ISO 14001?

ISO 14001 is an internationally accepted standard for Environmental Management System (EMS). The standard is designed to address the delicate balance between maintaining profitability and reducing environmental impact; with the commitment of your entire organisation, it can enable you to achieve both objectives.

The following key areas are addressed by ISO 14001:

- General requirements
- Environmental policy
- Planning implementation and operation
- Checking and corrective action
- Management review

This means you can identify aspects of your business that impact on the environment and understand those environmental laws that are relevant to your situation.

Benefits of ISO 14001:

- Demonstrate a commitment to achieve legal and regulatory compliance to regulators and government
- Demonstrate your environmental commitment to stakeholders
- Demonstrate an innovative and forward thinking approach to customers and prospective employees
- Increase your access to new customers and business partners
- Better management of environmental risks, now and in the future
- Potentially reduce public liability insurance costs
- Enhance your reputation
- Cost savings, which include energy & waste

We are an accredited certification body for ISO 9001

What is ISO 9001?

ISO 9001 is by far the world's most established quality framework and sets the standard not only for quality management systems, but management systems in general. It helps all kinds of organisations to succeed through improved customer satisfaction, staff motivation and continual improvement. It is the internationally recognised standard for the quality management of businesses. It is designed and intended to apply to virtually any product or service, made by any process anywhere in the world. ISO 9001 is designed to be compatible with other management systems standards and specifications, such as BS OHSAS 18001 Occupational Health and Safety and ISO 14001 Environmental. Standards can be integrated seamlessly by choosing an integrated management system which offers excellent value for money.

Why seek certification to ISO 9001?

Today there are more products and services available than ever before and the need for consumer protection has never been greater. Consumers can be protected by certification, inspection and testing of products and by manufacturing under certified quality management systems. Accreditation reduces risk for government, businesses and customers by ensuring thorough regular surveillances are carried out by independent and competent certification bodies.

Benefits of ISO 9001:

- It shows you are committed to quality, customers, and a willingness to work towards improving efficiency
- Access to new markets, e.g. Councils, Government Departments
- Identify weaknesses within a business and to implement improvements
- Staff motivation by defining their key roles and responsibilities
- Cost savings can be made through improved efficiency and productivity
- Training needs may be identified and addressed so that the quality of the work increases as well as productivity
- Improved compliance with Health & Safety and Environmental requirements

We are an accredited certification body for OHSAS 18001

What is OHSAS 18001?

OHSAS 18001 promotes a safe and healthy working environment by providing a framework that allows your organisation to consistently identify and control its health and safety risks, reduce the potential for accidents, aid legislative compliance and improve overall performance. OHSAS 18001 is the international recognised assessment specification for Occupational Health and Safety Management Systems.

Why seek certification to OHSAS 18001?

Registration to OHSAS 18001 demonstrates commitment to implementing and improving the way in which the Health and Safety system is managed. An independent certification body such as TÜV UK Ltd display a great understanding of this certification specification and focus on how to benefit the company and how the organisation can aim higher. The standard enables businesses to set targets through the Health and Safety Policy and track ongoing measurements against the process in place to ensure there is continuous improvement.

Benefits of OHSAS 18001:

- Potential reduction in the number of accidents
- Potential reduction in downtime and associated costs
- Demonstration of legal and regulatory compliance
- Demonstration to stakeholders of your commitment to health and safety
- Demonstration of an innovative and forward thinking approach
- Increased access to new customers and business partners
- Better management of health and safety risks, now and in the future
- Potential reduced public liability insurance costs
