ANNEX (3) – ISO 50001

☐ **main location (headquarter)** ☐ **other location (with personnel) No. ____**

Note: A location is a permanent site of the organization with personnel permanently on site and where energy is used. Companies with multiple locations are requested to fill out one table for each location.

Energy Consumption (of the location)

The total energy consumption of the site shall be taken into account (calendar year or other 12-month period).

All energy sources obtained from outside the boundary (of the EnMS) shall be taken into account.

- ☐ ≤ 20 TJ
☐ 20 TJ ≤ 200 TJ
☐ 200 TJ ≤ 2000 TJ
☐ > 2000 T

Energy sources (of the location)

- ☐ Electricity
☐ Natural Gas
☐ Fuels (diesel, gasoline, LPG)
☐ hard coal, lignite, coke
☐ local or district heating
☐ others: _

Total:

- ☐ 1 or 2
☐ 3
☐ ≥ 4

Only energy sources obtained from outside the boundaries shall be considered, i.e. natural gas which is delivered by the utilities shall be considered whereas the steam generated inside the boundaries shall not be considered.

Energy sources of less than 2% of the total energy consumption (of this location) can be excluded, provided that the consumption of this energy source doesn't exceed 200 MWh per year.

Significant energy uses (of the location)

The total number of all of the significant energy uses shall be counted (e.g. production lines, ventilation, air-conditioning, heating, cooling, lighting, transport, etc.).

Several similar production lines can be counted as one production line (i.e. they count as one significant energy use).

Also, integrated systems, e.g. air-conditioning systems (HVAC systems) may be counted as one significant energy use.

Total:

- ☐ From 1 Up To 3
☐ From 4 Up To 6
☐ From 7 Up To 10
☐ From 11 Up To 15
☐ ≥ 16

EnMS effective personnel (of the location)
