

CQI & IRCA Certified Course No.2087

PR 365: ISO 50001:2018 Auditor Conversion Training Course (Energy Management Systems)

TÜV NORD is a well-established and reliable partner for inspection and certification services throughout the world. With more than 4,800 experienced experts, our pool of auditors guarantees the highest level of competence in the certification of management systems, products and personnel.

Learning objectives

The aim of this course is to equip existing auditors of other management system standards with the knowledge and skills required to perform audits of energy management systems against ISO 50001, in accordance with ISO 19011 and ISO/IEC 17021, as applicable. In detail, the training course will provide students with the basis to become a competent Lead Auditor, including via the following:

- purpose of an energy management system
- explain the role of an energy management system and the business and environmental benefits of improving energy performance
- explain the interrelationship between management responsibility, energy policy, energy planning, implementation of policy, checking performance, management review and continual improvement
- benefits of a quality management system
- writing audit reports
- generating audit findings

Successful completion of the course (including examination) will result in the issue of a certificate which may be used to support an application to become registered as an IRCA auditor. Being certified as an IRCA auditor is a clear statement that you are a recognized, qualified and capable auditing professional.

		
Duration: three days with concluding examination	Location/date: business hotels, training centers or customers' premises if required	Course instructor: professional lecturers from TÜV NORD or appointed partner organization

Recommended prior knowledge

The students are expected to know the concept of management systems, preferably through completion of a Lead Auditor Course in another discipline. Furthermore, they require knowledge of the requirements of ISO 50001 as well as of energy management principles and concepts. Successful participation is supported by knowledge of the principles of fuel combustion, heat transfer and energy flow as well as methods and technologies for increasing efficiency. Prospective students who are not qualified auditors in other fields (QMS, EMS etc.) or have not attended a Lead Auditor Course in another discipline, will find the 5-day EnMS Lead Auditor Training Course more appropriate.

 **Group of participants**
All those who require detailed knowledge of EnMS auditing processes are welcome. Management system consultants, management involved in ISO 50001 implementation and maintenance, personnel working with regulatory authorities and all those who require a detailed knowledge of the EnMS audit process. The number of participants is limited to max. 20 people.

Our know-how for your success

TÜV NORD CERT is an internationally recognized and reliable partner for testing and certification services. Our experts and auditors have in-depth knowledge and generally have a permanent position at TÜV NORD. This ensures independence and neutrality, as well as continuity in serving our customers. The benefit to you is clear: our auditors accompany and support the development of your company and provide you with objective feedback.
