

ISO 14001:2026

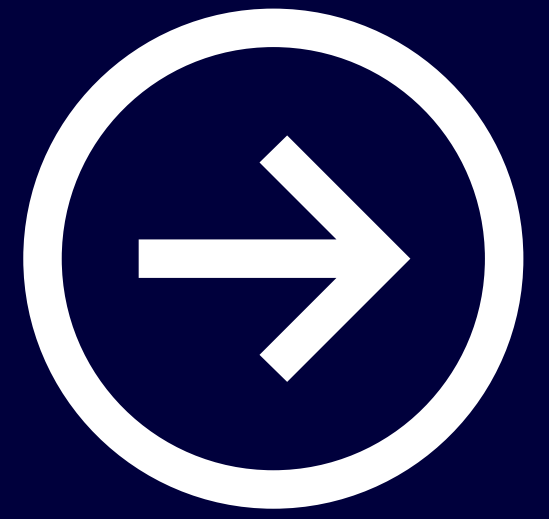

Two key updates you need to know

Structured Change Management

Organizations are now encouraged to implement formal processes for planning changes that might affect the environment. Whether it is a new technological development, product, or procedure, a careful review is now recommended.

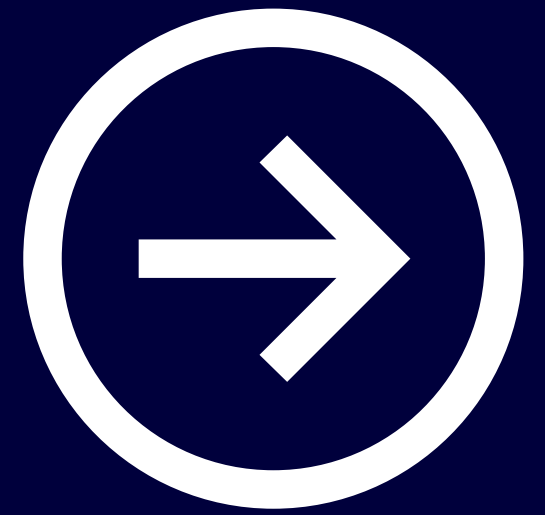

Pro tip: If you are ISO 9001 certified, this will feel familiar!

The Harmonized Structure (HS)

The standard is now aligned with the HS to ensure consistency across all management system standards.

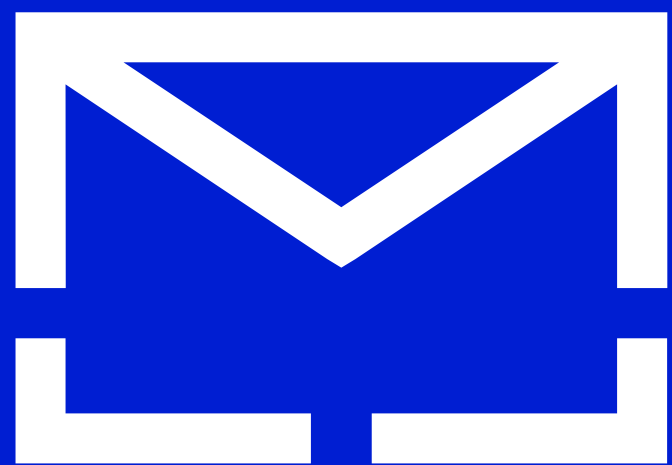

This makes integrating ISO 14001 with ISO 9001 or ISO 45001 easier than ever!

The Updated ISO 14001

- Highlights interaction with the organizational context
 - Strengthens the focus on climate resilience
 - Emphasizes sustainable resource use
 - Clarifies existing requirements
