

Webinar on Environmental Monitoring for Food Industry

Date: 11th September 2020, Time: 10.00am to 1.00pm

Course Features

Environmental monitoring is a quality program of testing the processing environment for contaminants, pathogens and verification to ensure that sanitation controls are being implemented and are effective.

The training aims to provide participants with effective implementation and benefits from Environmental Monitoring Program.

Course Objectives

- ♣ Pathogen detection/elimination (eliminates niches/harborage)
- ♣ Validation and verification of cleaning and sanitation programs (focused on validating cleaning and Sanitizing frequencies)
- ♣ Determine if plant maintenance needs to be updated (change gaskets, filters etc.)
- ♣ Evaluate hygienic design of the facility

Who should attend?

- ♣ Students
- ♣ Management Representatives
- ♣ Food Safety Team Leaders
- ♣ Health safety Quality & Environment Leaders (HSQE)
- ♣ Internal Auditors
- ♣ Consultants
- ♣ Supervisors and managers from production, quality and maintenance team
- ♣ Production executives involved in FSMS activities

Duration : 3 Hours (180 Minutes)

Registration Fee : Rs.1500 + 18 % GST

Course Contents

- ♣ Introduction.
- ♣ Risk based approach to determine the frequency of environmental monitoring.
- ♣ Environmental Monitoring employ as a means of –
 - Pathogen Environmental Monitoring (PEM)–
 1. Introduction
 2. Types of pathogens
 3. Establishing PEM program
 4. Sample collection, testing and frequency
 5. Evaluation of the results
 6. Documentation
 - Sanitation Verification
 1. Introduction
 2. Verification techniques
 3. Establishing the verification program
 4. Evaluation of the results
- ♣ Case Study

Benefits

- ♣ Ensure better operation and demonstrate food safety compliance.
- ♣ Provides valuable insights for effective environmental monitoring.

Issue of Certificate

Certificate of successful attendance shall be issued to all the delegates who attend entire duration of the course.
