

Online Training Program for Overview on Behavioral Based Safety

Date : 14th May 2020, Time: 10.00am to 2.30pm

Course Features

Today, there is a need for the entrepreneurs, working professionals, safety professionals, media and public to understand the importance of safety in human lives and manage the operations in various occupations in a way to promote safe working practices. Behavior Based Safety (BBS) is a program designed to influence employee actions toward safer outcomes, ideally by preventing an accident or injury before it occurs. Implementing a behavior based safety program is the most comprehensive way for organizations to promote safety, eliminate hazards and prevent human injuries and ill health. This training session will provide both employees and employers with information on how to properly implement a Behavior-Based Safety Program and how it is used to reduce workplace injuries and illnesses. The overall intent of the program is to enable organizations to use BBS as effective tool in improving safety culture.

Course Objectives

- ❖ To understand the terms safety, hazard, OHS risk and its relevance and importance at workplaces,
- ❖ To enable delegates to understand Key concepts in overall safety management,
- ❖ To introduce Behavior Based Safety Program as one important tool in safety management,
- ❖ To understand the elements of BBS program and its effective implementation,
- ❖ To understand the benefits of implementing BBS program in organizations,
- ❖ To help organizations in establishing a safety culture, promote risk based thinking and focusing on continual improvement in occupational health & safety.
