

Webinar for Understanding on Basics of Finite Element Analysis (FEA) and its Application in Pressure Vessel Design (Weekend Batch)

Date : 16th January'2021, Time: 10:00 AM to 1:00 PM

Course Features:

Course is designed to help the delegates to understand the background of FEA, FEA methodology, Element selection & Use, where code permit use of FEA and assessment of FEA results for code compliance with example of Nozzle analysis with external load.

Course Objectives:

To help the delegates to understand basic of FEA, parameters that affect FEA results and elements to be considered during review of FEA report, so that they can effectively apply the know how during day to day working with FEA.

Who should attend?

- ♣ Equipment design Engineer / Manager
- ♣ FE Analyst / Manager
- ♣ Project Engineer / Manager
- ♣ Estimation Engineers
- ♣ Representatives of Pressure Vessel Industry

WEBINAR

Issue of Certificate:

Certificate of successful attendance shall be issued to all the delegates who attend entire duration of the course.

Registration Fee : Rs. 1,500 + 18 % GST Per Participant

TÜV®

Course Contents:

Part 1 : Basic Of FEA Introduction

- ♣ FEA Background with process
- ♣ Material Properties, Element Types, Types of stresses and description
- ♣ Application of FEA in design codes like ASME SEC VIII DIV 1, 2, IBR 1950, EN 13445 and AD 2000 Merkblatt etc.

Part 2 : FEA Approach With Solved Example

- ♣ Steps involved in preparation of 3D CAD Model
- ♣ FE mesh model and quality check
- ♣ Loading and boundary condition
- ♣ Understanding of results
- ♣ Stress linearization and result assessment with conclusion

Duration: 180 Minutes (3 Hours)
