TUV India Training Academy

Training Program on Value Stream Mapping

Course Features:

This Value Stream Mapping course provides delegates with the practical skills to use value stream mapping in a service or manufacturing organization. Value Stream Mapping enables a company to identify and eliminate waste, thereby streamlining work processes, cutting lead times, reducing costs and increasing quality. It is a tool commonly used in lean continuous improvement programs to help understand and improve the material and information flow within organizations. Value Stream Mapping captures and presents the whole process from end to end in a method that is easy to understand by those working the process. It is a system which facilitates understanding of the current picture and plan for an improvement system and identifies bottlenecks and converts the process to flow like a stream to meet customer

Course Objectives:

This two day Value Stream Mapping training course uses a blend of theory and practical exercises. During the Value Stream Mapping course delegates will develop an understanding of:

♣ Customer value and the key elements and methods of Value Stream Mapping

♣ How to define and analyze the current state value stream map—material and information flows
