

AS/EN 9100 Aerospace Quality Management System Certification

Overview:

The AS/EN 9100 series of standards establishes a comprehensive quality management system for manufacturers and suppliers within the aerospace industry. From the technical point of view, EN 9100 et seq. standards correspond to the AS 9100 (USA) and JISQ 9100 (Japan) series of standards. They are based on the ISO 9001 standard and include further requirements which are specific to the aerospace sector.

Significance of the standard:

As with all standards, adherence to the AS/EN 9100 series is not mandatory. Use of the standards and proof of fulfilment of their requirements are based on contractual arrangements between the interested parties, and serves as a basis for confidence and trust.

Objectives:

The main objective is to achieve more consistent quality and also less waste within the entire value added chain through the use of a quality management system which is structured and operated according to EN 9100 et seq. The process and product quality achieved by means of systematic procedures secure the long lasting trust of your customers.

Target groups for certification:

Certification plays a major role for all companies within the supply chain of the aerospace industry. In fact, it

is an essential prerequisite for suppliers wishing to establish and maintain relationships with most of the well-known OEMs within the industry. In order to be registered as a supplier in the international OASIS (Online Aerospace Supplier Information System) database of the IAQG (International Aerospace Quality Group), certification is obligatory.

Based on ISO 9001, there are three standards for certification of different company activities: AS/EN 9100 for design, development, production, installation and servicing, AS/EN 9110 for maintenance and AS/EN 9120 for stockists and distributors.

Benefits of certification:

- Certification can lead to more efficient processes, fewer defects and higher customer satisfaction.
- Improved quality consistency with traceability.
- Mutually-satisfactory relationships with suppliers.
- Quality-focused leadership.
- Access to new customers and suppliers

Why choose TÜV India?

- Approved for various national & international accreditations for provision of System Certification services
- Wide pool of highly qualified and experienced Auditors & Tutors across India
- Comprehensive and diverse range of value-added services
- Key account management
- One-stop solution for your certification requirements

The route to certificate:

- Offer from TÜV India based on the information provided
- Order for certification
- Stage 1 Audit: Assessment of readiness for certification
- Audit Planning
- Stage 2 Audit: Certification Audit
- Nonconformity management (where required)
- Release by the certification body
- Issue of the certificate and annual surveillance audits

About Us:

TÜV India Pvt. Ltd. (TÜV NORD GROUP) is a customer-focused, innovative, and independent, technical, quality & safety services organization, dedicated to providing future-proof solutions through technological excellence for the success of its customers with the highest level of integrity. With a presence at over 40 strategic locations in India; a branch office in Sri Lanka and Bangladesh; state-of-the-art laboratories at Pune, Bengaluru, Noida and Jamnagar; 100 important countries worldwide and through digital means, we are always connected to you, our esteemed customer, anywhere, anytime.

We are proud to provide increasing levels of services to the best known, largest global and national companies as well as medium and small industries in diverse sectors like Oil & Gas, Petro-chemical, Nuclear, Renewables, Infrastructure, Food, Power, Manufacturing, Chemicals, Pharma, Paper, Automobiles, Railways, Aerospace, Defence, IT, Health, Hospitality, Retail, etc.

Over 1400 competent and experienced TÜV India experts spread across India and over 14000 TÜV NORD experts all over the world, enthusiastically support our clients by providing value-added services in Industry Inspection, European / International Approvals, Management System & IT Certification, Sustainability, Energy Audit, Water Audit, Carbon Services, Building Infrastructure & PMC, Renewable Energy, Food & Packaging Testing, Food Certification & Inspection; Testing of restricted and banned chemicals in Automotive and Electrical & Electronics components and other regulated industries, Product Testing – Electricals, Electronics and Industrial Machinery; Product Certification; Petroleum, Chemicals & Gas Cargo Inspection; Petroleum, Chemicals & Gas Testing; Railway Technology; Engineering, Safety Studies, and knowledge enhancing training programs under TÜV India Training Academy.
