

Bespoke Specialist Training & Knowledge Transfer for the Nuclear Industry

Bespoke Training Initiative

The UK is an extensive market for nuclear business, attracting companies with new technologies and services. This is likely to bring a need to understand how approval processes and procedures work in order to enter the market, and deliver programmes successfully whilst avoiding costly delays.

[TÜV UK Ltd has exclusive high-level nuclear experts with extensive knowledge and hands-on experience of Government and Industry across all activities in the nuclear sector.](#)

These experts have operated at senior levels as Regulators, in key Government departments and within the Industry. They draw upon their valuable experience in delivering complex nuclear programmes to time and cost.

Our bespoke, tailored training courses will allow you to benefit from our unique knowledge, extensive experience, links and connections, enhancing your understanding of the UK nuclear sector.

Bespoke Knowledge Transfer

Our offer is the provision of the transfer of both knowledge and know-how through bespoke training packages including workshops to State bodies and Universities, plus key decision-makers & Senior managers in commercial companies wishing to enter the market, enhance their knowledge in a field, or expand their areas of competence in the UK Nuclear sector. Staff teams benefit from a wide range of topic-based courses through direct interaction with our key experts and mentoring.

Member

Bespoke Specialist Training & Knowledge Transfer for the Nuclear Industry

Areas of High-Level Expertise & Experience available

- Safety, Security, Safeguards and Environmental Regulations
- Understanding and interpreting Regulatory requirements for licensing and permitting, including use of Safety and Environmental Cases and compliance with Assessment Principles and Guides
- Demonstrating Licensee capability including Intelligent Customer role
- Foresight and interpretation of UK Government policy and Nuclear Energy
