

Environmental Monitoring Program

An environmental monitoring program for food businesses involves a systematic approach to assess and control potential hazards in the production environment that could affect food safety. This program aims to identify and manage risks posed by contaminants, pathogens, or other factors that could compromise the safety and quality of food products.

By establishing and adhering to an effective environmental monitoring program, food businesses can proactively identify and manage potential risks, ensuring the production of safe and high-quality food products while complying with regulatory standards, thus ensuring consumer safety.

At TUV India, we understand the paramount importance of ensuring the safety and quality of your food products. Our comprehensive Environmental Monitoring Program stands as a robust shield, safeguarding your production environment against potential hazards and contaminants, thus fortifying your commitment to consumer safety and regulatory compliance.

Vectors of Contamination

- Raw materials
- Food Handlers & Equipment handlers
- Environment
- Processing Equipment

Through cutting-edge testing methodologies, including advanced microbiological assessments, environmental swabbing, air monitoring, hand swabs, equipment swabs and precise contaminant analyses, we detect and identify any threats to food safety. Our state-of-the-art techniques provide accurate results, empowering you to take informed actions to mitigate risks effectively.

Join hands with TUV India to elevate your food safety standards. Our Environmental Monitoring Program gives confidence in your operations, assures regulatory compliance, fosters consumer trust, and solidifies your position in the market as a provider of safe, quality food products.

Where to monitor

An environmental monitoring program should include the regular screening of surfaces, such as worktops, sinks, drains, utensils, equipment, walls, floors and ceilings, air quality within the food processing environment and food handlers.

Ways to monitor

- Contact Plates
- Swab Analysis
- Air Sampling (Active & Passive monitoring)

About Us:

TUV India Pvt. Ltd. (TÜV NORD GROUP) is a customer-focused, innovative, and independent, technical, quality & safety services organization, dedicated to providing future-proof solutions through technological excellence for the success of its customers with the highest level of integrity. With a presence at over 40 strategic locations in India; a branch office in Sri Lanka and Bangladesh; state-of-the-art laboratories at Pune, Bengaluru, Noida and Jamnagar; 100 important countries worldwide and through digital means, we are always connected to you, our esteemed customer, anywhere, anytime.

We are proud to provide increasing levels of services to the best known, largest global and national companies as well as medium and small industries in diverse sectors like Oil & Gas, Petro-chemical, Nuclear, Renewables, Infrastructure, Food, Power, Manufacturing, Chemicals, Pharma,

Paper, Automobiles, Railways, Aerospace, Defence, IT, Health, Hospitality, Retail, etc.
