

ISO 45001 - Occupational Health & Safety Management Systems Certification

Overview:

ISO 45001 is a worldwide standard for Occupational Health & Safety Management Systems. ISO 45001 audits consider both OH&S management systems and related operations for organizations that wish to improve their OH&S performance.

Certification according to ISO 45001 includes requirements such as obligation to undertake an OH&S review, to make use of the best technology available and to present the OH&S management of the organization. The objective is to achieve continual improvement over and above legal requirements pertaining to OH&S aspects.

Certification according to ISO 45001 in principle can be used by any organization. Decisive factors are the sector, sales market and objectives in the area of public relations.

Amongst other aspects certification according to ISO 45001 takes the following into consideration:

- OH&S policy, objectives and programmes
- Continual improvement of OH&S performance
- Audit of the OH&S Management System
- Adherence to OH&S legislation/legal conformity
- Registration with the relevant statutory & regulatory authorities

Benefits of certification:

- System-based approach to occupational health and safety
- Continual improvement
- Identification of potential risks and hazards and their elimination
- Greater employee awareness regarding safety aspects
- Increased motivation and qualification for employees
- Control and/or reduction in the number of accidents and interruptions in production due to better control over hazards at the workplace
- Focus on employee health & safety results in a satisfied, motivated and highly productive work force
- Better visibility on status of Legal compliance
- Improves company image and boosts international competitiveness
- Demonstrates an innovative and forward thinking approach
- Reduction in insurance costs
