

# ISO 46001 – Water Efficiency Management Systems Certification

## Overview

ISO 46001 specifies requirements and contains guidance for its use in establishing, implementing and maintaining a water efficiency management system. It includes monitoring, measurement, documentation, reporting, design and procurement practices for equipment, systems, processes and personnel training that contribute to water efficiency management. It is applicable to organizations of all types and sizes that use water. It is focused on end-use consumers.

This Standard is applicable to any organization that wishes to:

- Achieve the efficient use of water through the – reduce, replace or reuse approach
- Establish, implement and maintain water efficiency
- Continually improve water efficiency

## Benefits:

- Assessment to identify water consumption as a part of business indicators and annual economy
- Helps to identify inefficient uses threads and hotspots wherein water conservation and remedial measures can be undertaken
- Accountability in water use establishes basis for decision making for resource conservation
- Information for more reliable and extensive database for the creation of water policy
- Reduced water use and losses with efficient management of the resource

- Cost savings due to efficient water management
- Improvement of the water balance
- Improvement of the company's image
- More reliable data for sustainability reporting

## Audit Approach:
