

Integrated Management Systems: Certification of your forward-looking Corporate Management

Overview:

Integrated Management System is an excellent instrument for corporate management which helps increase customer's and employee's satisfaction by defining clear corporate goals and by lowering the barriers to national and international markets.

When it comes to certification of integrated management systems, the subject of quality is no longer the sole prime consideration and has not been so for some time. The focus is increasingly on major areas of environmental protection and of occupational safety and health. Within an integrated management system all operational sequences can be described taking into account requirements relating to environmental protection, quality, occupation safety and health and business management.

Integration is made much easier with the process orientation of ISO 9001:2015 or IATF 16949 to harmonization with ISO 14001 and to ISO 45001. The interfaces are under optimum control and the management documentation always remains transparent and clear. Topics such as internal audits, corporate objectives and programmes, document and date control, risk management and corrective action are handled across the board.

Benefits of Certification:

The right backing guarantees an effective integrated

management integrated system.

TUV India is at your disposal as a competent and experienced certification partner. Our highly experienced auditors will provide you a realistic assessment results, as you establish an effective management system within your modern corporate management.

Most of our auditors have qualifications in more than one field, namely - as occupational health & safety auditors or/and quality auditors, automotive auditors, and environmental auditors at the same time. This enables us to put together an audit team which completely enables to meet your auditing needs in an integrated manner.

An Effective and Efficient road to the audit:

We offer you certification of your integrated management system on a one-stop basis, thus considerably reducing the audit effort. Possible disturbances to operations can also be minimized with the help of an integrated audit. Auditing is process-oriented and so problems which arise across the interfaces between the different areas can be identified immediately. In integrated audit we assess and document all the potential improvements.

Make a good impression:

With a certificate from TÜV India you can show your customers that you have successfully implemented an integrated management system. Your certificate will indicate the relevant integrated standards.

An Integrated Management System gives you a lot of advantages:

- Reduction of Interface problems
- Introduction of a systemic procedure
- Transparency of business process
- Clearing regulations governing sequences and responsibilities
- Concentration of information
- Evaluation of suppliers and subcontractors
- Check of own safety standards
- Securing the core business by means of legal security
- Fulfilment of statutory and environmental and law requirements
- Reduction of production defects
- Cost reduction, e.g. by saving energy and cutting waste

The route to certificate:

- Offer from TÜV India based on the information provided
- Order for certification
- Stage 1 Audit: Assessment of readiness for certification
- Audit Planning
