Course Features

CE marking is a mandatory and regulatory requirement for exporting products to Europe. Knowledge of CE marking is very important to make your product safe for European markets as well as to other countries also where they want a safe product. CE marking involves various requirements to be met before the product is placed in the European Union. This course covers the technical and documentation aspects involved in safety and testing requirements for CE marking.

Who should attend ?

The course is designed for people from departments like design, production, quality, engineering, supplier development and export marketing who wants to make product safe for domestic sales as well as export to European and other countries.
