5. Surveillance Methodology

If applicable, prior to processing the initial certification you are required to complete the Manufacturer's section of the Check list for the initial inspection or monitoring of the factory production control according to the applicable standard and submit supporting evidence.

TÜV UK will undertake an Initial Inspection of the Factory or Quality Control System and undertake Continuous surveillance in accordance with the requirements of the applicable standard.

6. Certification

After each assessment a confidential draft report shall be prepared and sent to the person named as responsible for product conformity assessment. They shall have the opportunity to give comments on the report. Any corrective actions taken or planned as a follow up activity from the draft report shall be monitored and reviewed at a subsequent assessment.

After having received the response, a final assessment and report shall be prepared.

The report will be reviewed together with supporting documentation (e.g. corrective action report) by a suitable and competent member of TÜV UK's certification team. In any case TÜV UK may only issue the certificate when they have satisfactory evidence that you meet the requirements of the relevant standard(s). The certificate remains property of TÜV UK. The certificate is valid subject to annual surveillance audits and under the conditions that the client maintains the management system to the required standard.

7. Changes to Scope or Client Details

An extra audit may be required to verify changes or additions. After a successful completion TÜV UK may issue a new certificate showing the new scope of certification. The client agrees to carry the extra costs relating to such extra visits and efforts. The client agrees to amend all related advertising materials.

8. Special Assessment

A special assessment can be performed after an Initial or Surveillance Assessment has found major non-conformities having a significant impact on the product conformity or on the quality. During a Special Assessment visit the Lead Assessor shall, as a minimum, verify that the root cause of the non-conformities raised have been effectively addressed. Within this category is the occasional event of a short notice visit. This is to cover situations e.g. following up on a customer complaint. The client will be advised of the reason for the visit.

9. Suspending, Withdrawing or reducing the Scope of Certification

Certification of product conformity by TÜV UK may be suspended in cases when:

Suspensions longer than 6 months can lead to withdrawal, the subject of a management decision.

Suspension is lifted after a successful visit is carried out.

Certification will be withdrawn where your product demonstrates significant nonconformity with the standard or planned arrangements and in a case of failure in ability to react to and correct the nonconformities in a timely manner. Failure of you to pay TÜV UK invoices for services provided or a failure of you to provide product for assessment purposes may also result in withdrawal of the certification.
