

Quick Service Restaurants (QSR)

A QSR or a Quick Service Restaurant is a restaurant format in which customers are served food that is pre-prepared in a base kitchen and assembled in the restaurant kitchen. The service style is mostly self-service, and the table turnover rate is deliberately kept high.

The Quick Service Restaurants (QSR) market in India is projected to grow at a CAGR of over 18% during 2021-2025 due to increasing urbanization, rapid expansion in food delivery services, expanding young & working population, and growing number of dual-income families and rising disposable income in the country.

To run a QSR sustainably and successfully, the company should have a well-established quality system in place. At TUV India, we work with prominent QSRs in India and support them with a wide range of testing as well as certification requirements.

TUV India is well known for their wide coverage of sampling services pan India. We co-ordinate the sampling, transport, and testing of samples all done by highly skilled TUV employees who are regularly trained to meet quality requirements of the changing market and customer needs.

At our testing laboratory we provide pesticide residue testing, metal contaminants testing, nutritional analysis testing which also covers amino acid testing, sugar profiling, food package testing etc. Our facility also has an in-house microbiological laboratory where we also provide rapid genetic detection testing for selected strains for faster results as required by many such QSRs. TUV India also provides allergen testing. All our tests are done using internationally approved methods and best in class high end equipment.

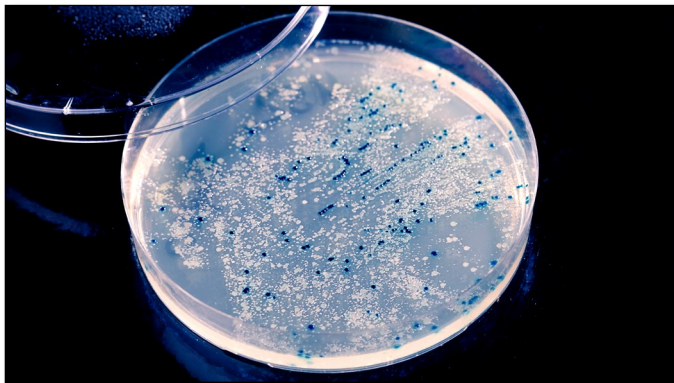

TUV NORD GROUP
Expertise for your Success

Few of the services we offer to QSRs:
