

Registration, Evaluation, Authorization and Restriction of Chemicals (REACH)

REACH is a regulation of the European Union (Regulation (EC) 1907/2006), adopted to improve the protection of human health and the environment from the risks that can be posed by chemicals. REACH stands for Registration, Evaluation, Authorization and Restriction of Chemicals.

In principle, REACH applies to all chemical substances; not only those used in industrial processes but also in our day-to-day lives, for example in cleaning products, paints as well as in articles such as clothes, furniture and electrical appliances. Therefore, the regulation has an impact on most companies across the European Union (EU). The Regulation also calls for the progressive substitution of the most dangerous chemicals (referred to as "substances of very high concern") when suitable alternatives have been identified.

With the constantly evolving global legislations and environmental requirements, the product compliance to these regulations has become important.

The compliance to ever evolving changes not only provides the cutting edge to the competition, but also acts as a step towards corporate social responsibility (CSR) for your company.

At TUV India we use internationally approved protocols and latest high end technologies such as ICP/MS, ICP/OES, GC-MS/MS, LC-MS/MS, HPLC, GC-HS, among others. TUV India conducts various tests including SVHC (Substance of Very High Concern) candidates listed by ECHA (European Chemical Agency) as per regulatory guidelines, by examining the intrinsic properties of substances in the various materials and products, thereby providing accurate and reliable results to ensure safety to human health and environment. .

There are 209 SVHC candidates listed by ECHA as of 25/06/2020. This list is updated biannually. TUV India, provides all REACH-209 SVHC test and can quickly develop tests for the newly added SVHC to ensure that our customer has a hassle free testing experience and can meet the requirements under REACH regulation.

TUV NORD GROUP
Expertise for your Success

Categories of commodities for which REACH is applicable:

- Plastic products
- Chemicals
