

Safety and Quality of Play and Sports Equipment

Manufacturers and operators of play and sports equipment bear a great deal of responsibility as they must ensure the safety and functionality of their equipment at all times, from the initial concept design to its production, installation, and operation. Often playground equipment and installations exhibit heavy wear and tear, either from rust, decay, splintering or vandalism. Unforeseeable safety problems can arise with outdoor play equipment due to the effect of severe weather. It is vital to establish and guarantee operational safety according to the applicable local and international standards. Several countries have already developed guidelines, regulations and inspection programs intended to protect users against accidents and injuries.

Inspections and certifications can be conducted according to all major standards such as EN 1176-All parts, EN 14960-All parts, EN 15567-1, EN 1177 EN 15567-2, EN 12572, EN 14974, EN 16630, EN 13219 local legislation and relevant national and international applicable specifications and standards.

As an independent third party and competent partner TUV India Private Limited supports manufacturers and operators to comply with standard requirements and provides both operators and users full confidence in all types of equipment:

- Playground equipment
- Public and private outdoor playgrounds

- Indoor play areas (soft play)
- Floating leisure articles
