TÜVUK

Introduction to Energy Security & Net Zero

TÜV UK launches its first online, live **‘Introduction to Energy Security and Net Zero’** training course.

“Gain a solid understanding of the energy market and become Energy Security and Net Zero literate with our live, online, Introduction to Energy Security & Net Zero training course.”

Leading on from our free webinar, this 1 day course (**4-5 December, 9am-1pm, UK time**) covers the following modules:

1. Net Zero
2. Energy Security
3. Energy Market
4. Energy Production
5. Global Energy Factors.
6. Energy Security & Net Zero Delivery Role
7. Government Energy Security & Net Zero Strategy & Policy

TÜV UK and Wray Castle’s combination of in-depth energy market knowledge and technology training expertise is uniquely positioned to deliver an effective learning solution on energy and Net Zero. This training course would benefit senior managers and executives in any industry, government department or corporate organisation looking to gain a solid understanding of the energy market and become Energy Security and Net Zero literate.
