

## NSAN Consultancy Services

NSAN and TÜV UK are working collaboratively to combine their knowledge, expertise and technical understanding, enhanced by first-hand experience, to provide a unique consultancy offering for companies working in nuclear. This joint offering rivals that of multi-sector consulting organisations in terms of the breadth and depth of knowledge and experience in the nuclear industry and professional business expertise.

The products and services delivered by NSAN since 2007 have played a key role in supporting the advancement of skills, knowledge and experience in the nuclear industry. NSAN's expertise of the skills for nuclear landscape including the capability of supporting partners and providers means they are a trusted skills partner for the UK's nuclear industry major employers.

In addition to the existing portfolio of products and services, NSAN are now able to offer tailored support through partnership with TÜV UK for consultancy services, utilising their elite team of expert Nuclear Associates who have held some of the most senior positions in the UK Regulatory system, Government, Academia and the Nuclear Industry.

These expert consultants will work closely with clients to enhance their individual and collective capabilities, delivering an agreed return on investment and transferring sustainable skills, developing organisational strategies, addressing short-term resource needs and delivering certainty in people capabilities.

In addition, they will support clients as they:

- Tackle key imperatives within the business.
- Make decisions and build roadmaps to transform learning initiatives and organisational culture.
- Assess current capabilities and prioritise talent initiatives.
- Create an agile, productive workforce with the right staff, the right skills and knowledge, in the right place at the right time.
- Source fresh thinking and deep insights to attract, organise, motivate and develop the right people for the business
- Build a high-performing HR function in support of business goals.
- Tap into a rich understanding of people and how they behave, based on clear analysis grounded in research and our extensive practical experience – all leading to bold ideas and innovative solutions.
- Support leaders and managers to drive positive outcomes aligned to business strategy.
- Bridge the gap between technical, commercial and operational functions to provide a clear strategic vision for delivery.
- Expand clients' areas of key competence of specific relevance to the UK Nuclear sector.

In engaging with NSAN consultancy services TÜV UK can add value by providing high-level expertise enhanced by first-hand experience in:
