

# Procedure and Personnel qualification

Structural steel and pressure equipment fabricators make it possible to use technically demanding structures within buildings, factories and warehouses, bridges, pressure equipment, pipes, valves and others.

When performing these complex tasks, legally-compliant documentation of processes is extremely important. This applies to pressure equipment manufacturers working in accordance with the PED, constructor according to EN 1090 and suppliers of railway and defense engineering.

With neutral, recognized validation by TÜV NORD, specialist welding companies benefit from qualification verifications and welder qualification for joining procedures (WPQR – Welding Procedure Qualification Records and WPQ - Welder Performance Qualifications) drawn up in cooperation with recognized material testing laboratories which ensures the integrity of documentation. The procedures and welders can be certified according to European and international standards and regulations.

TÜV NORD holds all the necessary approvals in order to qualify your processes. The TÜV NORD certificate is recognized throughout the world and helps you to win new customers. Based on our 100 years more than experience, we also offer further services in relation to all welding tasks. In addition, we are able to provide information about all standards and regulations and advise on legal aspects.

# Welding Technology

## Our services

- Qualification of welding procedures (WPQR) and WPQ - Welder Performance Qualifications accordance to EN ISO 15614 and ISO 9606
- Support by International Welding Engineers/Inspectors (IWE/IWI), additionally qualified according to EN ISO 9712
- Confirmation of reliable and reproducible work procedures according to AD 2000-HP0, EN ISO 3834, EN 1090-1, EN 15085, DIN 2303 and further standards
- Manufacturer certificates also as part of a quality management audit according to EN ISO 9001
- Support in all welding tasks
- Information regarding current changes in standards and in legal questions
- Manufacturer qualification, welding procedure and personnel qualification from one source

### The benefit to you:

- Qualification of your company is demonstrable for sales purposes
- Internationally recognized TÜV NORD certificates
- Comprehensive one-stop project support
- Further training events for your employees
- Manufacturer qualification, welding procedure and personnel qualification from one source

### Our expertise:

- Many years of experience in national and international projects
- Accreditation as a neutral inspection organization
- Up-to-date knowledge of national and international regulations and standards
- Fast reaction time
- Strong regional presence

We will be pleased to advise you in detail. Please contact us.
